

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims, including those in the First Preliminary Amendment, in the application:

Listing of Claims:

Claim 1 (currently amended): A sputtering target transport box ~~comprising~~ having a void the size of a sputtering target, ~~wherein said transport box further having~~ comprising: an inner frame ~~comprising~~ defining a void the size of a sputtering target; a plastic inner box ~~comprising~~ having a lower plate and an upper plate; an outer box formed of aluminum or wood ~~or a material in which~~ plastic is ~~affixed to aluminum or wood and comprising~~ having an outer frame, a bottom plate, a top plate and a cover ~~having~~ providing an inner size that is greater than said inner box, the inner box charged with the sputtering target is further placed in the outer box for transport, the inner box may be independently removed from the outer box for transport; and

supports for mechanical transport ~~are provided to~~ extend from the bottom plate of said transport box and wheels for man-powered transport are provided ~~to the~~ adjacent ~~an~~ edge portion of said bottom plate, ~~and~~ the height ~~from the bottom plate~~ of the supports is greater than the height ~~from the bottom plate of that~~ the wheel extends from the bottom plate of the outer box.

Claims 2-10 (canceled).

Claim 11 (new): A sputtering target transport box according to claim 1, wherein a handle is mounted on a side face or the bottom plate of the outer box opposite the wheel, and wherein the transport box is inclined during transport when utilizing the handle such that the transport box is supported on the wheel and the supports do not interfere with a floor face.

Claim 12 (new): A sputtering target transport box according to claim 11, wherein a resin or wood material is affixed to respective faces of the periphery, corners and supports of the outer box to cushion impact with the floor face of a building.

Claim 13 (new): A sputtering target transport box according to claim 12, wherein a conductive thin film is affixed to an outer surface of the outer box to prevent electrification.

Claim 14 (new): A sputtering target transport box according to claim 13, wherein a through-type hold is provided on the inner box.

Claim 15 (new): A sputtering target transport box according to claim 14, wherein a cushion material is provided between the outer box and inner box.

Claim 16 (new): A sputtering target transport box according to claim 15, further comprising a joint removably fixing the cover of the outer box to the outer frame of the outer box.

Claim 17 (new): A sputtering target transport box according to claim 1, wherein a resin or wood material is affixed to respective faces of the periphery, corners and supports of the outer box to cushion impact with the floor face of a building.

Claim 18 (new): A sputtering target transport box according to claim 17, wherein a conductive thin film is affixed to an outer surface of the outer box to prevent electrification.

Claim 19 (new): A sputtering target transport box according to claim 18, wherein a through-type hold is provided on the inner box.

Claim 20 (new): A sputtering target transport box according to claim 19, wherein a cushion material is provided between the outer box and inner box.

Claim 21 (new): A sputtering target transport box according to claim 20, further comprising a joint removably fixing the cover of the outer box to the outer frame of the outer box.

Claim 22 (new): A sputtering target transport box according to claim 1, wherein a conductive thin film is affixed to an outer surface of the outer box to prevent electrification.

Claim 23 (new): A sputtering target transport box according to claim 22, wherein a through-type hold is provided on the inner box.

Claim 24 (new): A sputtering target transport box according to claim 23, wherein a cushion material is provided between the outer box and inner box.

Claim 25 (new): A sputtering target transport box according to claim 24, further comprising a joint removably fixing the cover of the outer box to the outer frame of the outer box.

Claim 26 (new): A sputtering target transport box according to claim 1, wherein a through-type hold is provided on the inner box.

Claim 27 (new): A sputtering target transport box according to claim 26, wherein a cushion material is provided between the outer box and inner box.

Claim 28 (new): A sputtering target transport box according to claim 1, wherein a cushion material is provided between the outer box and inner box.

Claim 29 (new): A sputtering target transport box according to claim 1, further comprising a joint removably fixing the cover of the outer box to the outer frame of the outer box.
